## Superoptimization

September 15, 2022

Madhu Mohan Neleman

- 1 Introduction
- 2 Simple Assembly language Optimization Techniques
- 3 Learnings from Synthesis kernel and OS
- 4 Introducing SuperOptimizers
- 5 Peephole Superoptimizers and Modern Compilers
- 6 Conclusion

This presentation talks about superoptimization

- Replace decision constructs with logical and arithmetic operations
- Unroll loops to avoid pipeline dependencies
- Parallelize Load/Store with MAC instructions
